

Figure 1. Distribution of the three *Psammodestes* species sampled in this study. Dots represent the sampling sites of this work while polygons symbolize previously reported sampling sites by Ceccarelli et al. 2018, where the *Psammodestes* species have been found. *Psammodestes arthuri* is represented by the red color, *Psammodestes coreodes* with green, and *Psammodestes tertius* with blue.
